

Len-Tex CVT Wallcoverings Support LEED v4 Credits

Len-Tex wallcoverings with Clean Vinyl Technology™ (CVT) are eligible within the LEED rating system for both new construction (LEED-NC) and commercial interiors (LEED-CI) projects. LEED rates projects, not products, therefore a product cannot carry its own LEED rating.

However, the use of Len-Tex wallcoverings may contribute to LEED points in several categories. LEED credits are earned when a product or group of products are combined to achieve a specific end result (indoor air quality, recycled content, etc).

LEED v4 for Commercial Interiors & New Construction

Building Product Disclosure and Optimization

MR Credit Option 1 | Material Ingredient Reporting

This credit rewards project teams for selecting products for which the chemical ingredients in the product are inventoried using an accepted methodology and for selecting products verified to minimize the use and generation of harmful substances.

Our CVT wallcoverings have a complete, published Health Product Declaration (HPD) with full disclosure of known hazards in compliance with the Health Product Declaration Open Standard.

Low-Emitting Materials

EQ Credit Option 1 | Ceilings and Wall Systems

Wallcoverings installed must be tested & determined compliant in accordance with California Department of Public Health (CDPH) Standard Method v1.1-2010 for VOC emissions.

Len-Tex Clean Vinyl wallcoverings meet this specification and may contribute to this credit.

Low-Emitting Materials

EQ Credit Option 1 | Interior Adhesives and Sealants

Wallcoverings installed using compliant, low-emitting adhesives may contribute to this credit.

Len-Tex Clean Vinyl wallcoverings installed with recommended Roman ECO adhesives reduce indoor air contaminants and may contribute to this credit.
